Summary

Software Developer with around 2 years of experience, primarily in frontend development. Skilled in building responsive and user-friendly interfaces, integrating APIs, and optimizing performance. Seeking to leverage my expertise to contribute and grow professionally in the field of software development.

Work Experience

Full Stack Developer, Finstein Advisory Service LLP

July 2024 - Jan 2026

- Developed the frontend of a medical test analysis application focused on supporting pregnancy related scans, ensuring an intuitive and responsive user experience.
- Designed and optimized the UI/UX to streamline the process for clients, reducing scan review time and enhancing overall workflow efficiency.
- Collaborated closely with the backend team to integrate APIs, manage data flow, and implement minor backend features using FastAPI for seamless frontend-backend synchronization.
- Utilized technologies such as NuxtJS, ReactJS, Tailwind CSS, to build scalable and maintainable components tailored for medical data visualization.

Technical Skills

Programming Languages

Core Java, JavaScript, Python, SQL

Frontend Technologies

NuxtJS, ReactJS
Tailwind CSS

Backend Technologies

FastAPI, NodeJS

Tools & Platforms

Jira, Git, Postman

Version Control

GitHub, GitLab

Education

Bachelor of Technology(B.Tech)

University College of Engineering Villupuram

Sep 2019 - June 2023

- Specialization in Information Technology (CGPA: 8.25).

Higher Secondary Certificate(HSC)

Velammal Matric Higher Secondary School

June 2016 - March 2017

- Specialization in Biology (Percentage: 84.5%)

Secondary School Leaving Certificate(SSLC)

Sri Ramakrishna Vidyalaya Matric School (Percentage: 94.5%)

June 2014 - April 2015

Additional Information

- Participated in an inter-office hackathon, where our team won the Best Product Award.
